SUMMARY

Senior Engineer with nearly 5 years of experience building configurable, enterprise-grade web platforms. Specializes in **React, TypeScript, and schema-driven frontend architecture** — from admin dashboards and permission systems to reusable rules/actions engines, shipped with the DevOps to run in production. Currently at LYIK Technologies, where I was promoted to Senior Engineer in April 2026 after shipping v2 and driving much of the v3 form platform.

EXPERIENCE

Senior Engineer — LYIK Technologies Pvt. Ltd.

Apr 2026 – Present

On-site · Bengaluru · Previously Enterprise Engineer (Apr 2023 – Mar 2026)

- **Promoted to Senior Engineer** in April 2026 after shipping v2 and driving much of the **v3** configurable, schema-driven form platform (React 19 · Redux Toolkit · TypeScript · MUI).
- Built the v3 **admin dashboard**: a form-management console (Material React Table over the forms API, with create/delete and confirmation flows) and a **user-management tree-table** modeling the org as a hierarchy/DAG, with full **user & relationship CRUD** wired to REST APIs.
- Added **bulk user onboarding** via client-side **CSV/ZIP** upload (jszip), plus a permission **guardrail** system — permission-gated routes, form-list guards, and rule-driven dashboard widgets configured through `dashboard.json`.
- Built the **maker-checker approval workflow** (checker flow, verify state, submit confirmation) and **trusted API records** (tokenized nodes protected against user overwrite).
- Worked across the core form **engines** in the `@lyikadmin/lyik-form` monorepo — **actions**, **rules** (persona/permission-based hide & disable), **derive**, and **navigator** (array-boundary navigation) — and wrote their **unit/integration test suites**.
- Delivered an **SSO login flow**, **client-side encryption**, **JSON-driven theming** (theme.json, custom themes), **funcex** expression support, **liveness/KYC** detection, ID obfuscation and multi-file upload.
- Set up **Docker/Nginx** containerization and **GitHub Actions** CI/CD; also built a **Frappe-based ERP** and a ServiceNow integration POC. Contributed to the company's **first enterprise client acquisition**.

STACK: React 19, TypeScript, Redux Toolkit, Material UI, TanStack Query, Material React Table, REST APIs, JSON-driven config, Monorepo, Vitest, Docker, Nginx, GitHub Actions, Frappe

Associate Web Developer — Content Enablers Inc.

Mar 2022 – Mar 2023

Remote · Bengaluru

- Led a **website revamp** using ReactJS and Bootstrap 5.
- Integrated **Google Analytics** and Google Tag Manager for product insight.

STACK: React, Bootstrap 5, Strapi CMS, Google Analytics, GTM

SKILLS

Frontend Core	ReactJS, Next.js, TypeScript, JavaScript, Redux Toolkit	UI & Design Systems	Material UI, TailwindCSS, Design Tokens, Responsive Design, Figma
Architecture	Schema-driven UI, Rule/Derive/Actions engines, Monorepo, JSON Logic/JSONPath, System Design	State, Data & Testing	TanStack Query, React Hook Form, Zod, Vitest, React Testing Library
Backend & DevOps	Node.js, Docker, Nginx, GitHub Actions, Frappe ERP, Azure	Security & Delivery	Client-side Encryption, SSO, Guardrails/Permissions, Liveness/KYC, REST APIs

EDUCATION

B.E. in Computer Science Engineering

WVCE, Mysuru — Visvesvaraya Technological University

Languages English · Kannada · Hindi
